ABOUT ME

My name is Nikifor, but you can call me Niki. I'm from Madrid with Bulgarian nationality, and I've been living in Spain since I was 6 years old. I studied a Higher Degree in Administration and Finance, but after a while, I realized it wasn't what I wanted to dedicate my entire life to. That's when I discovered this fascinating field of programming...

I decided to make a big turn in my life and started by enrolling in an academy, "Impulso06: Computer Systems Programming". They taught me well, and I learned quite a few things. The technologies I mastered: Java, Spring Boot, HTML, CSS, JavaScript, Servlet, Apache Tomcat, SQL, and MySQL. I also gained insights into concepts like MVC, Networks, SOLID, and Web Client-Server, among others.

After finishing, I had the opportunity to join the "Hackea tu futuro" program, offered by a reputable institution like "The Valley" in collaboration with Barrabes.biz and Red.es. I learned about Big Data, the different roles involved, techniques, technologies, and how to use them. They taught us: Python, SQL, NoSQL, Cloud, ETL, Power BI, Google Analytics, DataSet, Machine Learning, Data Analysis, Google Colab, Tableau.

Quite pleased with what I learned.
